

SNAP-ON FLANGE PROTECTOR

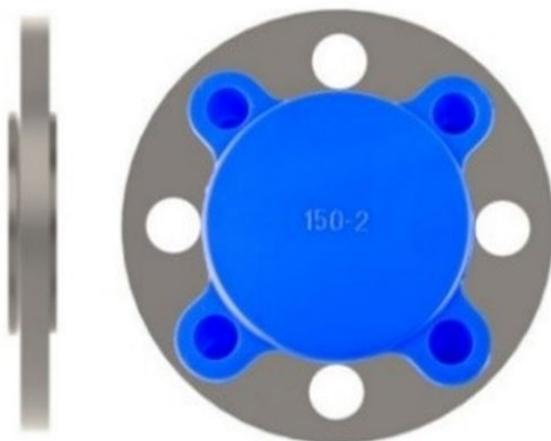

The Snap-On Protector is a fast assembly protector that requires less time to install on the flange.

It is made of polyethylene plastic molded with plugs that are sized to fit easily into the bolt holes of a flange. They are UV resistant that will not crack from sun and age.

Sizes available:

1/2" thru 12"- 150# Series

1/2" thru 12"- 300# Series

PLASTIC FLANGE PROTECTOR

Plastic Flange Face Protector are Weather and UV resistant, made of .065"/1.66mm thick HDPE, and can last for several years. These protectors have four bolt holes set to your flange size and are fastened with Flange-Lock Plugs. Flange-Lock Plugs are sold separately.

These protectors can be made to any size, shape and dimension that may require either standard or custom specifications. Give us a dimension, bolt circle diameter, bolt hole size, and we can give you a quote with quick turn-around.

Sizes available:

14" & above, 150# & 300# Series
