

Stick-On Protectors are economical, flat plastic circular discs, that protect the raised face portion of flanges.

The peel-and-stick design saves time and money and is commonly used for sandblasting and painting applications, as an alternative to using messy duct tape.

Made of 1.66mm polyethylene plastic, they are resistant to weather and UV.

Features:

- » Designed to cover raised face portion of flange only
- » Economical, so can be discarded after use
Quick, simple installation
- » Quick, simple removal
- » Ideal temperature range 10°C – 65°C
- » Must be used on clean, dry surfaces
- » 2 styles available – ring type without center, solid ring type with center
- » Custom designs available on request
- » Available for all size flanges
